EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech.	G.Narayanamma Institute of Technology and Science, Hyderabad	8.58 (Current)	2021-Present
TSBIE	Narayana Junior College, Hyderabad	99.0%	2021
SSC	Shine High School	10.00	2019

EXPERIENCE

- National Institute of Technology** Nov 2023 - Dec. 2023
Research And Development Intern Warangal, India
 - Developed a project on "Diabetic Retinopathy" using Convolutional Neural Networks (CNN) and Weka for image classification. The project involved implementing a CNN model to detect and classify retinal images, assessing accuracy and performance through Weka's data analysis tools. Achieved high classification accuracy, demonstrating the effectiveness of deep learning in medical image diagnostics.
- PWC** Jan. 2024 - July. 2024
Training program Hyderabad, India
 - Completed a 6-month training program at PwC, earning micro-certifications in Programming Fundamentals with Python, Object-Oriented Programming in Java, RDBMS using Oracle, Cyber Security, and Overview of DevOps. Gained hands-on experience and expertise across diverse technical areas, enhancing skills in software development, database management, cybersecurity, and DevOps practices.

PROJECTS

- QuizTie** Apr. 2023 - Jun. 2023
[Link](#)
 - Developed a quiz application using basic HTML, CSS, and JavaScript for the front-end interface, and MongoDB for backend data storage. The project involved designing an interactive user experience with dynamic question handling and real-time scoring, while MongoDB managed user responses and quiz data efficiently.
- College Gate Automation System** Apr. 2024 - Jul. 2024
Drive
 - Developed an IoT-based "College Gate Automation System" using an ESP8266 microcontroller for wireless communication, integrating Wi-Fi, email notifications, and data logging. The system automates gate control and sends real-time updates to a specified email and ThingSpeak API for monitoring weather parameters and gate status.
- Online Event management system** Dec. 2024 - Mar. 2025
 - The Online Event Management System is a web-based platform developed using React.js for the front end and MySQL for the back end. It allows users to browse, book, and manage events efficiently with a user-friendly interface. The system provides features like event creation, ticket booking, and real-time updates to enhance user experience..

ACHIEVEMENTS

- Hackathon 2022 Software and Hardware edition:** [Certificate](#)
- Writing and presenting a Research paper:** [Certificate](#)
- Ethical Hacking and Cyber Security:** [Certificate](#)
- Model united 2023:** [Certificate](#)
- International Pre conference on Robotics(IEEE 2023):** [Certificate](#)

SKILLS

- Programming Languages:** C, Java
- Development Skills:** HTML, CSS, JavaScript
- Coursework:** Data Structures and Algorithms, Database Management Systems, Object Oriented Programming in Java, Design and Analysis of Algorithms, Discrete Mathematics, Software Engineering

EXTRACURRICULAR

- Student Volunteer,** Abhaya Women safety and protection Club
- Student Volunteer,** Philanto club
